

長庚大學期中、期末考試答案用紙

學年度 第 學期 末考 貨工

系 姓名 何佳蓀

學號 B0729029

$$[1]^{(a)} 73.0 - 1.96 \times \frac{8}{5} < \mu < 73.0 + 1.96 \times \frac{8}{5}$$

$$69.86 < \mu < 76.14$$

否，因為此數據在範圍內

$$[1]^{(b)} 73.0 - 2.046 \times \frac{9}{5} < \mu < 73.0 + 2.046 \times \frac{9}{5}$$

$$69.32 < \mu < 76.68$$

否，因為此數據在範圍內

$$[2]^{(a)} E(\hat{p}) = E\left(\frac{X}{n}\right) = \frac{1}{n} E(X) = \frac{1}{n} np = p$$

$$[2]^{(b)} \text{std}(\hat{p}) = \sqrt{\text{Var}(\hat{p})} = \sqrt{\text{Var}\left(\frac{X}{n}\right)} = \sqrt{\frac{1}{n} \text{Var}(X)} = \sqrt{\frac{1}{n} npq} = \sqrt{\frac{1}{n} pq}$$

$$[2]^{(c)} 0.6 - 1.96 \sqrt{\frac{0.6 \times 0.4}{100}} < p < 0.6 + 1.96 \sqrt{\frac{0.6 \times 0.4}{100}}$$

$$0.55 < p < 0.65$$

$$[2]^{(d)} 0.6 - 1.645 \sqrt{\frac{0.6 \times 0.4}{100}} < p < 0.6 + 1.645 \sqrt{\frac{0.6 \times 0.4}{100}}$$

$$0.56 < p < 0.64$$

$$[3]^{(a)} P\left(\frac{X}{n} = \frac{66}{100} \mid p = 0.6\right) = b\left(\frac{66}{100}; 100, \frac{2}{5}\right) = 0.039$$

st binom pmf (100, 0.6)

$$[3]^{(b)} \sum_{k=66}^{100} b(k; 100, \frac{2}{5}) = 0.13$$

$$[3]^{(c)} 68$$

(d) 接受因 X^* 是 68 而現在只有 66 份是

$$[3]^{(e)} \alpha = P(\text{當 } p=0.6 \text{ 時 } X \geq 68) = \sum_{k=68}^{100} b(k; 100, 0.6) = 0.05$$

$$[3]^{(f)} \beta = P(\text{當 } p=0.7 \text{ 時 } X < 68) = \sum_{k=0}^{67} b(k; 100, 0.7) = 0.29$$

(請翻面繼續作答)
